

## Conclusions ASTROCULTURE COURSE

YEKATERINBURG, 2020

In the closing session, some participants mention in the chat or/and email us several comments:

I want to say thank you very much for your incredible lessons, they were very interesting. Many ideas can be used both during astronomy classes and during physics classes. Thank you so much !!!

Thank you for sharing your knowledge with us! In the photo, my students were happy to make a model of the celestial sphere. They loved it!

Thank you very much for your lessons. They are very important to me because I will be able to use the new information in my work.

I participated in the entire course, of course.

I'm just the beginner in the sphere of Astronomy. Your courses were my first experience of studying this science. It is a great start for me! Thank you! Thank NASE!

I am intended to continue my development in Astronomy. If I can be of any help to you, I'll be glad to assist as a volunteer! I have a good command of English, I know German (intermediate). I have organisational skills and practice of teaching (not Astronomy). And I have a desire to learn new things to make constant progress.

Thank you very much!!!

Thank you very much to all :)

Thank you very much! I am very happy to have attended these courses!

Many thanks to Rose and the organizing team!
