

“132 International NASE-IAU Astronomy Course”

Bushehr, Iran, March 2019

Questionnaire

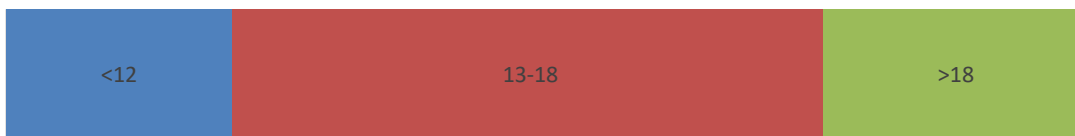

Discipline:

Physique	Maths	Chemistry	Nat Sciences	Soc. Sciences	Astron	English	Primary school
17%	10%	8%	15%	12%	10%	20%	8%

Level:

<12	13-18	>18
21%	55%	24%

Is this school your first contact with astronomy?

Yes	No
21%	79%

If no, what is your background in astronomy?

Self-taught	Courses	Amateurs	University
34%	23%	40%	3%

What was the cause for participating in this course?

Professional	Personnel
48%	52%

What do you think of the choice of dates?

Very well	Well
53%	47%

What about duration?

Very well	Well	Short	Length
47%	36%	15%	2%

What do you think of the organization of the day (and night) in four different types of activities: conferences, working groups, workshops, observations?

Very well	Well
16%	41%

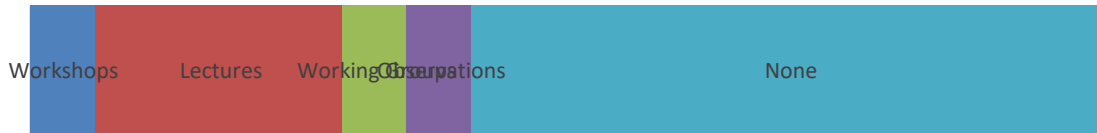

What kind of activities have preferred?

All	Workshops	Lectures	Working Groups	Observations
53%	29%	3%	3%	12%

What kind of activities you like least?

Workshops	Lectures	Working Groups	Observations	None
6%	23%	6%	6%	59%

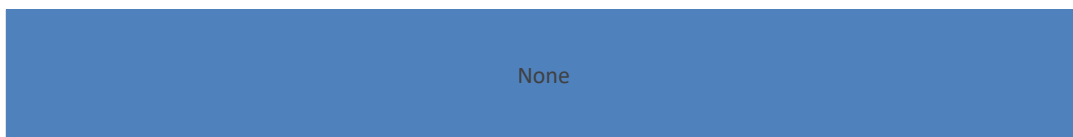

The subjects, have met your expectations?

Very well	Well
70%	30%

What would you delete?

None
100%

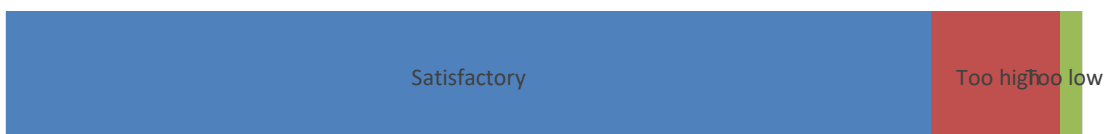

What would you add?

None	More observations	Videos
68%	16%	16%

The level of activities has been:

Satisfactory	Too high	Too low
86%	12%	2%

What is your opinion about the teaching methods of teachers?

Very well	Well
16%	41%

What is your opinion about the CD that you received?

Very well	Well
16%	41%

What is your opinion about coordination between different activities?

Very well	Well
55%	45%

What is your opinion about the visit session astronomical?

Very well	Well	Poor	Very poor
40%	50%	6%	4%

What is your overall opinion of the course related to:

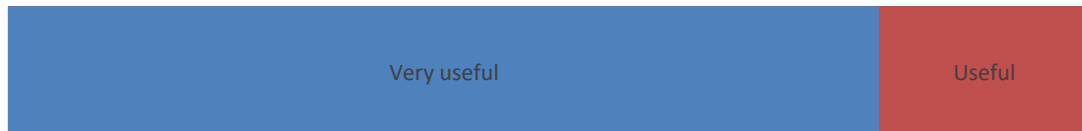

a) Exchanges and contacts with other participants?

Very interesting	Interesting
57%	43%

b) What is your opinion about the usefulness of the course to their teaching?

Very useful	Useful
81%	19%

What especially criticize?

- All was great
- I appreciate you with all of my heart dear professors!
- The number of NASE professors should be more than 2 in order to have more participants in such amazing course
- The course was too short
- All parts in this course are very well and I enjoyed
- Nothing. Everything was good
- None
- It would be much better if you speak more and our translators tell us that you said.
- The astronomical visit was not so sufficient and could not learn any special thing from relation of astronomy and mosque.
- Everything was satisfactory
- All sectors are good
- Everything was just perfect in my sight

What you would value more?

- The life lessons I learned from professors were awesome! We can use in our life
- Professors were very patients and very kind and we learn a lot of things from them that astronomy visit in observatory and observations in the beach

- Workshops and Lectures were much better
- I liked more workshops
- Workshops are great and useful and we will use it in the future in our classes
- I enjoyed the astronomy for 4 years. I attended some courses but none of them can help me to understand astronomy practically. Here in this course, really I understand it and I am sure that never forget what I learned here.
- I am teacher-student. I am training to be teacher. The most important thing I have learned was the way that NASE visitors were teaching. You made the class very happy and very energizing. I learned: No matter how old is a teacher, a teacher will strong young
- The way in which we do more instead of just seeing and giving seeped!
- Specifically the practical method would help a lot in teaching students.
- Lectures are very very good
- Solar System
- Your easy explanations
- Good activism and behavior
- Workshops and working groups
- Team work and good work and modeling with discarded tools
- In this case my view about teaching changed. Thank you

Other observations (it is important to have them!)

- Please accept the invitations from other cities like Shiraz! We will be really happy to see you again
- We want you to come back again to Iran for visiting other cities of this country like Khuzestan
- In other seasons of time of year
- I think everything was perfect and I am glad to be NASE teacher
- As you mentioned during the course you tried to use simple and really less stuff to teach astronomy. This shows us teaching astronomy is much more easier than we taught, and myself decided to do the same because I live in a small village and actually we do not have any observatory or astronomy courses, but after this course I understand that I do not need expensive stuff to do that. I will always remember your love to astronomy and teaching.
- It was a great honor for me to attend this course. Thank you for your coming
- I hope we can help NASE and we can use your methods. Thank you very much.
- Everything you prepared was awesome and I am so help thankful if you, my great teacher, and I wish can come like you and help and inform other people in the world about science. Miss you so much.
- It will be interesting if we can see some astronomical movies
- Everything were fantastic and I would have more things to do
- Thank you
- You work really very well and thank you very much for your troubles.
