a) Exchanges and contacts with other participants?

Very interesting	Uninteresting
86%	14%

b) What is your opinion about the usefulness of the course to their teaching?

Very useful	Useful
86%	14%

What especially criticize?

- None
- Nothing
- Since I majored in and studied astronomy by myself, the level was good. I hope developed courses for high school teachers.
- The practical activities consisted of simple and interesting things, which were good to use in the field. The theory lectures related to the practical were also held together, which was very helpful. The special lecture was a special time with people who loved astronomy and touched the field of astronomy in real life. Overall, I feel that the composition of the content is better than the job training run by the local education office. Thank you.
- None. satisfied fully
- Well..

What you would value more?

- All
- Hand on activities
- Workshop
- It seems that the practical contents can be used immediately during the science club activities. I thought that I could try to find a simple inquiry related to the content of the curriculum by myself.
- Everything.
- All of anything

Other observations (it is important to have them!)

- It is very useful course for teachers
- It was useful courses. I really enjoyed.
- If you want to learn about astronomy and are looking for activities you can do with your students, I recommend this training.
- Workshops, the best.
