

## Conclusions Istanbul June 2021

**At the end of the course, the participants expressed several comments. Here we present some examples of their comments during the closing session:**

The materials are accessible and it is easy to find them in Istanbul

I enjoy the very simple experiments, very practical amusing and mixing science with entertainment in the best way

For primary school teachers are useful activities in each workshops

For secondary school teachers are the full contents interesting in the full course

Thank you for the course and I will use the materials and activities in my classes. Thanks a lot

A very good course. It is really great initiative as well an amazing opportunity to all of us. All sessions were Outstanding and interesting filled with innovation. Thanks a lot to all RESPECTED speakers and team members. Thanks.

It was a very useful presentation. Thank you very much.

I think we are doing activities that will be useful for my students

Thank you very much for this workshop

Wonderful work shop thank you very much.

I would also like to thank to Fatemee for her lovely workshop.

it was very entertaining and educational... I am excited to use it with my students. Thanks for all.

Especially the notebook work on the movements of the moon is very suitable for my students

Things I have always wondered about the sky and could not understand have been clarified. I am more confident now.

With these two models we made today, I think I learned different methods of teaching my students about the formation of the phases of the Moon and the positions of the Sun. Thank you
