What especially criticize?

- Nothing
- No
- The long duration of the training
- Nothing but we want a longer and detailed training with a teaching support strong enough to learn to apply these teaching methods with the pupils and the children.
- Nothing special
- For the moment nothing is open to criticism
- Nothing in particular
- The duration of the training could have been longer, so as not to skip certain theoretical information during the conferences.

What would you value more?

- Workshops
- Working groups
- Reduce the training time a bit, and put it in two or three parts.
- workshops
- The large number of activities that participants can do
- All
- I really enjoyed the training, it was at the top, thank you bcp

Other observations?

- The workshops, the group spirit among all the participants, the participants' passion for science in general
- Almost all the parts are appreciable including astronomy which seems intended for different school levels
- Exchange and interactivity
