

Conclusions of NASE Course, Iran, Shahre-Rey

November 28th and 29th

In the last session of the course, the participants can give their opinions about the activities, philosophy and workshops of NASE.

- I am a teacher student of teacher training university and I am studying educational science. I'm really enthusiastic about astronomy but I have never seen the course like NASE that teach astronomy to teachers specially. Thank you for this great course, I'm waiting for the future NASE courses.
- The topic of course is very attractive.
- The content of course is very useful and practical.
- Thank you for your good teaching and let us know about future NASE courses.
- We hope that this lessons and courses will be in the schools science book for teachers and students.
- Thanks a lot for attention to different province and give a chance to students for knowing sky in best way.
