

Conclusions of NASE Course of Astrobiology

Istanbul, Turkey 2022

A short summary of the course is following, where there are included several opinions from participants in the closing session

- These workshops were very useful because I learned how to teach with intuitive and simple methods rather difficult concepts of astrobiology.
- It was amazing to me how scientists found out that the Sun is a third-generation star.
- I will definitely repeat the experiment with the possibility of the existence of life in the extreme conditions on the exoplanets. Thanks for this course.
- I am happy I have the recipe for the DNA extracting. I'll try also with some fruits.
- Thank you very much for the courses. The explanations were clear and the experiments very simple and they can be done in class with easy-to-find materials.
