

Conclusions of NASE Course of Astronomy

Mobarake, Iran 2022

After the course, the participants give their opinions during the closing session. There are some examples, here:

- This course had some excellent lessons and very good topics which can be useful for participants' fields, especially in physics.
- The topic of course is very attractive.
- There were many workshops and less time for break. Some of participants would like if we can have more break time in next courses.
- The topic of course is very attractive. This is not what we can find in our schools and it's very important.
