Very useful	Useful
54%	46%

What especially criticize?

- Nothing
- None
- It would be fantastic to do some observations the day we were all together.
- Perhaps more hands on.
- I have no criticisms of the course, I found it very good.
- I would love to have more lecture instead of zoom. But it was so well explained and entertainment with examples and videos that we learned and enjoyed the course.
- Nothing, it was a good experience.
- None criticize
- Everything was amazing, I learned a lot about astronomy, and I didn't know too many things as I know now.

What you would value more?

- The explanations were highly to the point
- The workshops.
- The knowledge of Rosa in this subject and also to be able to come to USA.
- The practices
- Working in Groups
- I learned some things.
- The simplicity and accessibility of the materials to explain the concepts to the students in a participatory way
- I found it very valuable that the course content is appropriate for elementary students.
- The hands on activities, work in groups in a collaborative way, and the clear explanation of Rosa.
- Knowledge
- Easy access to the materials used
- The experience of knowing more about this interesting topic which has blown my mind.

Other observations?

- Great experience and huge learning

- I did enjoy it. The only thing is on the last session, I could not do the workshop due to the work I had to do on that day. Luckily, I was able to listen and see my colleagues doing the activities.
- I would have liked more workshops
- Very interesting, educational and fun
- It was very interesting and the teacher was very knowledgeable in the subject matter.
- I love the passion of Rosa at the workshop. She kept our attention and we were easily motivated to learn.
- Just to keep track of the time to do activities with our hands and monitoring that we are all ready before moving to the next activity.
