

# LUHYA TRIBE

## Kenya, Africa

**Rosa M. Ros, Dismas Simiyu**

*International Astronomical Union  
Technical University of Catalonia, Spain, Meru University of Science  
and Technology, Kenya,*

The 14% of  
Kenya population  
are in Luhya  
tribe.

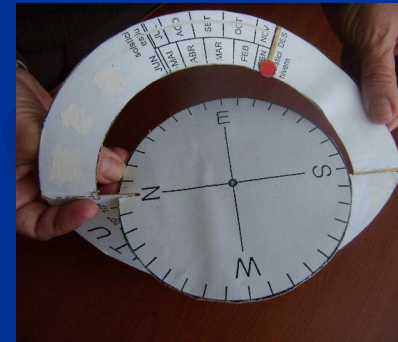

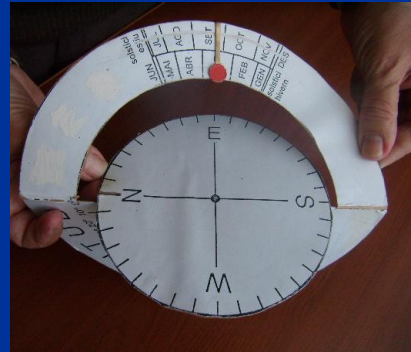

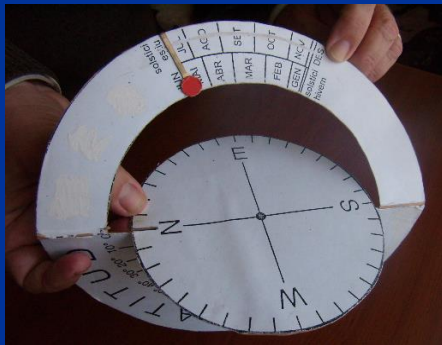

The Luhya tribe  
is in the  
occidental  
province of  
Kenya.

The father said to his son: “you have to move the animals to drink in the river when your shadow will be in the middle of your legs”.

The occidental province of Kenya is approximately in the Equator, that is to say the Sun is in the zenith (more or less) during practically the full year

when the shadow is in the middle of his legs, the Sun is in the local meridian, then, it is approximately at midday

**Many Thanks  
for your attention !**
