

Conclusions

NASE Course in CLUJ

At the final meeting with the participants, the structure and quality of the course were discussed and the trainers asked for ideas for improving it.

In general, the participants considered that the course had an excellent quality

- 1) Thank you for this workshops. There were incredible. I didn't imagine that there are so simple methods to explain the eclipses, the expansion of Universe, etc.
- 2) I am glad that I attended this course. It's the first astronomy course in my life but I learned so many simple experiments for my students.
- 3) It's the first course where I learned something very useful for my classes. I am happy I decided to follow this course.
- 4) I like to attend another course of NASE with more hands on activities.
- 5) I was afraid this course will be very difficult for me but after the first day I realized that I understand the new notions and also the experiments are easy to repeat in the classroom with my students.

It was considered that, generally, the tools are very interesting.
