

## Conclusions of the NASE cours in Lusaka, Zambia

December 2019

Finished the course the working Group on Evaluation token place.

The first participants that give their opinion had been several secondary school teachers from Lusaka

- I enjoyed very much the course. Models are motivating and play with them is good for students. From her point of view: Only talk is not enough. Talk and make something related in order to understand better is more productive

Other opinion was:

- Really I enjoyed a lot. I can teach about several astronomical topics after the course, for instance, I know that the Sun do not rise in the East every day. I have the experience to know the astronomy from an interactive point of view

Several opinions was similar about:

- The most special in the course are the workshops. Congratulations

Another opinion was:

- This meeting was very useful for me. I did not have experience in astronomy and, in this course, I can see that with cheap materials we can do astronomy

And finally the last contribution was:

- I am very happy after this course. I feel confidence that I learn and I recognize that the instructors including us a lot in their activities

The Working Group finished with the closing session
