

Conclusions 2nd ASTROBIOLOGY COURSE

Busher, Iran, 2020

This year 2020 with the COVID19 it was not possible to organize face to face courses. Then NASE organized several courses online in Iran according with ITAU. At the end of the second course in astrobiology there were several comments by participants.

- Thank you very much for this useful class. Thanks Rosa and Corina and instructors. I am waiting for new face to face course in Iran because I like to learn any experiment face to face.
- Unfortunately at the end of the course I had a problem about internet. But the course was very interesting and useful. Thanks because however you couldn't come to my country because corona viruses but you prepare online course. The experiments are very interesting. I will use them for students.
- Thank you very much for this special course. Thanks NASE. We are waiting for other course. Just I think if time of workshops be more, it will be better. And we had some problem about Google meet, if it is possible we have online classes in better website, it will be better.
- I am very happy I could be in this course, NASE course change my attitude and workshops were very good. Just their time was very few please increase time of each workshop.
