

Conclusions ASTROBIOLOGY COURSE

ATHENS, GREECE, 2021

After to finish the course and during the closing session, it begins the discussions session. The participants mention that:

- they want more experiments with astrobiology because these are very interesting
- they are very happy
- they followed these workshops because they learned many very simple experiments for their students
- they put many questions about the spectrometer and about Hershel Experiment
- they liked the experiments with infrared and UV sources

The participants are really enthusiastic about the seminars and what they offered them, which was unique!

Thank you for the seminars, with this unique culture of having models-observations through simple instruments!

All the teachers participated, and were a lot, were really happy and they will use the knowledge gained.
