

Conclusions ASTROPHYSICS COURSE

Delhi, India, 2021

There are several comments about the course from different participants:

1. The course is easy to understand and the models are very intuitive. I would like the course very much, thank you.
2. It was a pleasure to have an international course online about astrophysics.
3. We appreciate the enthusiasm of the instructors and their very simple experiments and so good explanations.
4. I learned so many experiments. Now I can show to my students the different properties of electromagnetic waves and it's very important to "make" the invisible ones visible.
5. I will repeat the easy experiments in the classroom. There is so nice that I need cheap materials.
6. I will try to implement what I learned in my school and I hope that my students we'll be more interested to study sciences. I like so much the practical activities.
