

Conclusions of NASE Course, Iran, Fars

December 16th 2021

During this session the interaction between instructors and participants is fluent and easier. We present several opinions in the closing session as simple way the get conclusions

- It was fantastic. Because we could prepare some materials and tools that we can easily use them.
- The topic of course is very attractive.
- The content of course is very useful and practical.
- I am a student and I think it was very motivating.
- The instructors were very good and helpful. They helped us to do everything and answered the questions very well.
- Thank you for your good teaching and let us know about future NASE courses.
- We hope that this lessons and courses will be in the school's science book for teachers and students.
- I think this is the best way to teach astronomy. But not only astronomy. We can teach other courses with this method too and it will be very practical.
- Many levels of teachers and students can learn with the course. Fantastic!
