a) Exchanges and contacts with other participants?

Very interesting	Interesting	Uninteresting
42%	50%	8%

b) What is your opinion about the usefulness of the course to their teaching?

Very useful	Useful
58%	42%

What especially criticize?

- Everything was great, except that it would be better if you could use the telescope more
- Everything was great and I hope this course will be held in person
- It was so good. Everything was great and fun
- Everything is fine but you should spend more time answering questions during the conference.
- Increases history and more interaction with any person at any age.
- Occasionally the group had participated in activities and it just limited to some simple handy crafts.
- You are very well
- Very well
- Maybe talking more about details of stars/plants/etc would be cool but the plan was good enough
- No.

What you would value more?

- Using the telescope more and showing more about the thing that are in the sky and actually space of course with pictures.
- Workshops
- Everything
- To learn new things from the best teachers in Iran that will be very useful to me in the future.
- In my opinion the lectures and the way that they presented was brilliant.
- Workshops
- Understand topics
- Showing live sky maybe?
- Our recognition in this field is very useful and good

Other observations

- I do not understand what you mean by observation. But if you mean experiments and activities, I find it interesting. But there are some problems. You need to spend more time doing activities such as scissors and explain more clearly.
- If you mean that it is important to have other observations or not, yes it is absolutely important because it both attracts people to learn and the person understands the content better.
- Well the things we did like making the box for seeing lights were cool
