

Conclusions of NASE Course of Astronomy

Ekaterinburg, Russia, 2022

Opinions from participants in the chat, during the closing session

- Thank you very much! First time in this course. Learned a lot for myself
- Very interesting, the presentations are very interesting. The videos are just great, I get a lot again
- Thanks a lot. It was very interesting and useful
- Rosa thanks! I am an astronomer, and everything that concerns theory is well known to me. But nevertheless, I was interested in getting new experience with the production of didactic materials, I learned a lot from here.
- This year I managed to attend courses thanks to distance learning. Very courses are needed, in simple words about the complex. And manuals and video materials save in preparation for the lessons. Thank you!!
- Unfortunately, I could do not all tasks, because my children are sick. I liked this course very much, I will use these exercises on my lessons
- I'll be glad to join you. Astrophysics is interesting to me, as well as observational and practical astronomy.
