

NASE COURSE IN ARDEBIL, IRAN

CONCLUSIONS

During the final session of the course, participants had the opportunity to give their opinions about the course as conclusion of it. We list here, several of opinions following:

- Thank you very much. I always watched the sky but did not have any of these tools, but now it is great to have useful tools to use.
- Thank you to all the dear teachers of this course. I want to say that the sky is for you to explore and enjoy.
- It was a great course. We learned new tools and how to work with them. I live in Ardebil and I am not in Bushehr, but I hope to see you.
- In fact, I am a teacher and not a professional astronomer, but I am very interested in astronomy and I have been interested since childhood. I like to teach my students what I have learned in this course. I want to keep in touch with you and attend in NASE courses and programs. Most of my students are interested in astronomy, and even their parents ask questions about astronomy.
- I want to thank you and say that I know carpentry and I can make these tools with wood and always use them.
