What especially criticize?

- None
- Nothing
- Observations
- It was so good
- No
- Time duration was a little boring
- It is very busy for five hours every day. It would have been better if it had been held on more days with less time
- The time of course
- Time was long
- Please dedicate more time into workshops.
- Good class and workshop
- Google meet to connected is so late
- Not critical
- I like that course hold in short time and more workshops
- Everything was good
- Everything was cool
- Translate all the words of Ms. Rosa and Corina into Persian
- Everything was useful and satisfying
- If you add practical tasks to this course will be more useful for us
- For me it was the first time that I join workshop about astronomy and I was not familiar with some devices that they made in class. I think it would be better if at first they send us pdf or some information about the things that we should make in class.
- The workshop is very good thanks
- Classes provide little information over a long period of time and the efficiency of classes is low and in addition the level of classes is low.
- This course was very useful and interesting
- Everything was okay

What would you value more?

- Workshops
- Observation
- Experiments
- Lecturers, teaching, ethics and friendly behavior of teachers
- Lectures
- About astronomy I value more observation
- Conferences and experiments that we do
- Learning
- The efforts of all our teachers were very important.
- The way of teaching
- More workshops
- Conducting practical workshops with proof of relevant physical relationships

- The teachers were good. What I like about the workshop is the theory part like the information about the earth and other planets. I think that online classes I can make more contact with theories instead of experiments. However, the workshop was good.
- Everything was perfect
- Lecture and observation
- Practical work and teamwork
- The material was explained with a simple test and the language was easy to understand
- Learning more useful subjects that we did not know before.

#### Other observations

- In my opinion, if a different class on a different level held was great
- Thank you very much for the useful period.
- Our vision of teaching has been changed
