

Conclusions

Busher, Iran, 2020

In general, the participants considered that the course had an excellent quality. The trainees thanked them for the opportunity to attend this course in Iran and stated that they wish to continue participating in Astronomy training courses.

In the final session, several participants give their opinions about the course.

- The course was very good. However before this program, I had interest about astronomy and news of that, but after NASE course my attitude changed, and I found new aspect: these days I use NASE material in my class.
- The quality of course was high. The relationship between participant and instructor was very good.
- I am a science teacher. This course was extremely useful for me. Now I am in love to with astronomy. Every time my students have a lot of question about astronomy, by NASE course I can help them very well. Thank you for this great course.

The course was finished after this session
